UCLA GERIATRIC MEDICINE FELLOWSHIP
POLICY ON APPOINTMENT

A. Upon completion of the selection process, fellows are appointed for one year (see Policy on Resident Eligibility and Selection).

Initial appointment and any subsequent appointment are contingent upon meeting California state licensing requirements, and visa requirements, if applicable. Residents who graduated from U.S. or Canadian medical schools must obtain a license to practice medicine from the State of California prior to the commencement of a third year of postgraduate training in an ACGME accredited program. Graduates of international medical schools, whether United States nationals or not, must obtain a license to practice medicine prior to the commencement of a fourth year of postgraduate training in an ACGME accredited program. Failure to have the necessary license or registration will result in non-appointment.
